

# C62 series L2 PRO 90W bt PoE Switches

The C62 series from AETEK offers a broad range of **NTS L2 PRO Managed PoE Switches**, equipped with multi-port Gigabit PoE (10M/100M/1G) and SFP transceiver (100M/1G) slots for flexible link. The C62 series has two sub-models including 4 ports and 8 ports complying with IEEE 802.3bt/at/af standards with sufficient PoE power budget for any application.

Besides a NTS L2 PRO Managed PoE switch, C62 series is also an IP camera controller specially designed for easy overview & management of IP cameras complying with ONVIF, even if installers is not familiar with advanced software of NTS L2 PRO Managed PoE switch. A centralized Web GUI (Graphic User Interface) makes it easy to find cameras and generate topology automatically once ONVIF IP cameras are connected to C62 series. Meanwhile, installers can easily catch comprehensive individual camera information including camera list, IP/MAC address, topology, power consumption, and traffic monitoring thru web browser.

#### **Features**

- Layer 2 Switch
  - 802.1d (STP), 802.1w (RSTP), 802.1s (MSTP)
  - Loop protection
  - SNMP v1/v2c/v3
  - QoS
  - VLAN
  - Ethernet cable length measurement
  - DHCP Server
- Network Topology System
  - Automatic discovery for ONVIF camera
  - · Generates camera topology map automatically
  - Cable diagnostic & reboot camera remotely
  - PoE management
  - Topology view / Floor view / Google map
  - Monitor / Configure / Manage ONVIF camera thru web
- Flexible SFP transceiver ports for uplink
- Supports 10/100/1000Mbps data rates
- Support Auto-MDI/MDIX
- Built-in 6KV surge protection for each PoE port
- IEEE 802.3az Energy Efficient Ethernet standard for green power
- 19" Rackmount installation

# **Cable Diagnostics**

# **Technical Specifications - Software**

IP Surveillance Graphical U	Jser Interface Specifications		
Auto Discovery	Discover IP cameras complying ONVIF automatically		
Topology View	Generate Topology maps to manage IP cameras		
Traffic Monitor	Comprehensive chart to show traffic status		
Cable Diagnostic	Real time to verify the cable status		
PoE Management	Reboot IP camera, alive checking, PoE configuration, PoE status, Link status		
PoE Management			
Port Configuration	Supports per port PoE configuration function		
PoE Scheduling	Supports per port PoE scheduling to turn on/off the PoE devices (PDs).		
Auto-checking	Check the link status of PDs. Reboot PDs if there is no responses		
Power Delay	The switch provides power to the PDs based on delay time when PoE switch boots up, in order to protect switch from misuse of the PDs.		
Layer 2 Switching Specific	ations		
Spanning Tree Protocol (STP)	MAC Bridges Standard Spanning Tree 802.1d, Rapid Spanning Tree (RSTP) 802.1w, Multiple Spanning Tree (MSTP) 802.1s		
IP/Mac Port Trunking	Link Aggregation Control Protocol (LACP) IEEE 802.3ad , Static aggregation.		
VLAN	Supports up to 4K VLANs simultaneously (out of 4096 VLAN IDs), Port-based VLAN, 802.1Q tag-based VLAN		
IGMP v1/v2 Snooping	IGMP limits bandwidth-intensive multicast traffic to only the requesters.		
Layer 3 Switching Specific	ations		
DHCP Server	Assign IP to DHCP clients		
DHCP Server Security	Assign IP to DHCP clients		
DHCP Server Security Port Security	Assign IP to DHCP clients Locks MAC addresses to ports, and limits the number of learned MAC address		
DHCP Server Security Port Security Storm Control	Assign IP to DHCP clients  Locks MAC addresses to ports, and limits the number of learned MAC address Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port		
DHCP Server Security Port Security Storm Control Loop Protection	Assign IP to DHCP clients         Locks MAC addresses to ports, and limits the number of learned MAC address         Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port         To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations.		
DHCP Server Security Port Security Storm Control Loop Protection QoS	Assign IP to DHCP clients         Locks MAC addresses to ports, and limits the number of learned MAC address         Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port         To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations.		
DHCP Server Security Port Security Storm Control Loop Protection QoS Classification	Assign IP to DHCP clients Assign IP to DHCP clients Locks MAC addresses to ports, and limits the number of learned MAC address Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations. Port based, 802.1p VLAN priority based		
DHCP Server Security Port Security Storm Control Loop Protection QoS Classification Bandwidth Control	Assign IP to DHCP clients         Locks MAC addresses to ports, and limits the number of learned MAC address         Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port         To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations.         Port based, 802.1p VLAN priority based         Ingress policer, Egress shaping and rate control, Per port		
DHCP Server Security Port Security Storm Control Loop Protection QoS Classification Bandwidth Control Management software	Assign IP to DHCP clients  Locks MAC addresses to ports, and limits the number of learned MAC address  Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations.  Port based, 802.1p VLAN priority based Ingress policer, Egress shaping and rate control, Per port		
DHCP Server   Security   Port Security   Storm Control   Loop Protection   QoS   Classification   Bandwidth Control   Management software   Port Mirroring	Assign IP to DHCP clients         Locks MAC addresses to ports, and limits the number of learned MAC address         Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port         To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations.         Port based, 802.1p VLAN priority based         Ingress policer, Egress shaping and rate control, Per port         Traffic on a port can be mirrored to another port for analysis with a network analyzer or RMON probe. Up to N-1 (N is Switch's Ports) ports can be mirrored to single destination port. A single session is supported.		
DHCP ServerSecurityPort SecurityStorm ControlLoop ProtectionQoSClassificationBandwidth ControlManagement softwarePort MirroringIEEE 802.1ab (LLDP)	Assign IP to DHCP clients         Locks MAC addresses to ports, and limits the number of learned MAC address         Prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on a port         To prevent unknown unicast, broadcast and multicast loops in Layer 2 switching configurations.         Port based, 802.1p VLAN priority based         Ingress policer, Egress shaping and rate control, Per port         Traffic on a port can be mirrored to another port for analysis with a network analyzer or RMON probe. Up to N-1 (N is Switch's Ports) ports can be mirrored to single destination port. A single session is supported.         Used by network devices for advertising their identities, capabilities, and neighbors on an IEEE 802ab local area network, Support LLDP-MED extensions
